Digital Change Makers. How to Thrive in the Age of Digital Transformation in the Educational System

July 5, 2023 | 10:00-11:30 CET

A Knowledge Building Activity of the European Digital Education Hub

Context: The aim of the event is to get an overview of what it takes to holistically shape digital transformation in educational institutions and how people, places and technologies are to be considered. Learn what future skills are the most important for change and how they can be trained. Have an idea of best practices of how students can become Digital Change Makers.

The session will build up knowledge on the environment in which digital change makers can make a difference and what competences they need. The discussion will focus on how participants can transfer the best practices to their own institutions to get from "Nowland to Nextland".

Join us with your experience and know-how to contribute to a report with main guidelines.

The event will take place in the **Knowledge Building** channel on the MS Teams platform of the European Digital Education Hub.
